THE WEALTH OF
INDEPENDENCE

E-KENDRIS

PROFESSIONAL ONLINE ACCOUNTING WITH ABAWEBFIDUCIARY

You want to have your accounting effectively and efficiently managed. You determine the amount of work which is divided between KENDRIS Ltd. and you based on capability available in your company and existing accounting knowledge.

Integral Solutions

You determine with which program parts and functions you want to work and which work processes should be taken over by KENDRIS Ltd. We can offer you everything in one place from simple bookkeeping to assistance in bookkeeping such as accounts receivable and payables as well as salary bookkeeping.

Our service is based on AbaWeb. You can work without problems via the internet on our ABAWebFiduciary server and no locally installed ABACUS software is required any longer. It is not important which type of computer and which operating system you use - Apple, PC, etc. In addition, for collecting data you can print out analyses locally regardless of the time or place. Expensive additional software is not necessary with the ABAWebFiduciary solution.

Zurich, August 2011
GRA

By means of note and log book system a mutual exchange of information takes place which documents the status of the work. For example, up to which period the items been fully booked or that preliminary entries for salary and personnel information changes have been carried out so that salary statements can be issued.

REQUIREMENTS

„AbaWebFiduciary“ functions on all operational systems (Apple, PC, etc.) with an internet connection and at a minimum Internet Explorer as per Version 6.0 as well as Office 2003.

For each access the external user will be authenticated by means of a Post Certificate and then receives corresponding access to his data. The Post Certificate serves as proof of identity and ensures a secure log in procedure.

VALUE ADDED

Economy

- > Integral solution for accounting
- > Access to a professional and always current accounting system
- > Direct client connection by simultaneous work on a user surface
- > You do not need to worry anymore about software installation and updates
